AMENDMENT

This communication is responsive to the Office Action dated January 1, 2001, concerning the above-referenced patent application.

RECEIVED
APR - 9 2001
TC 3700 MAIL ROOM

Please amend the application as follows:

In the Title:

Please cancel the present title and substitute -- METHOD FOR WINDING SEGMENTS OF A SEGMENTED WOUND MEMBER OF AN ELECTROMECHANICAL DEVICE --.

In the Specification:

- *On page 2, delete the first full paragraph, and replace this paragraph with the following:*

Various techniques are known for constructing a stator of an electric motor. For example, according to one known technique, the stator is constructed using a large number of very thin laminations that, when stacked together, produce a stator structure that is generally cylindrically shaped but with bobbin structures that extend the length of the cylinder and that protrude radially inwardly. The bobbins are then each wound
